

EXERCISE: BOOKMARKS

BY: THOMAS BORZECKI

WEB RESOURCES

The web itself is the best resource for all information about making and designing web pages. You will find it invaluable when you are completing assignments and building web pages. The web also contains plenty of information about what the current and foreseeable trends are in web design.

TASK - WEB DESIGN RESOURCES

In each case below, write out the title of the site or article and the address beside it. Don't forget you can use a URL shortening service such as: goo.gl, tinyurl.com or ow.ly if the address of the web page is inconveniently long.

EXERCISE: WEB THEORY

BY: THOMAS BORZECKI

MISC

GOOGLING SKILLS

In this exercise, you will be searching for common web terms and jargon. This sheet will also serve as a reference for future assignments. Keep in mind all the terms in this exercise pertain to the web but there is always a chance that there are similar terms in other fields. In all cases, you should be looking for definitions specifically related to the Web.

TASK - WEB DESIGN JARGON

In each case, write a brief definition of the term in your own words. Additionally, acronyms should be written out in long form.
